

Overview

The family of HP LTO Ultrium tape drives is HP's premier line of backup devices. Based on the LTO Ultrium format, an open standard with a well-defined eight-generation roadmap, HP LTO Ultrium tape drives offer customers the best choice for investment protection. With ultimate reliability and ease of use in mind, even at 100% duty cycles, HP's rugged design builds on superior LTO technology and adds advanced features like hardware data encryption to create a new level of data protection. The tape drives employ dynamic data rate matching to adjust to the speed of the host, reducing wear and tear on both drive and media and increasing performance, even on slower hosts. HP's ultra-durable soft-load feature automatically positions the data cartridge together with the highly reliable HP leader-capture mechanism make your backup and restore operations more reliable. Support for HP One-Button Disaster Recovery provides the easiest way to restore data in the event of a disaster.

The family of tape drives also features support for HP Library and Tape Tools which provides HP TapeAssure health monitoring, diagnostics, and performance optimization. Included with the HP LTO Ultrium tape drives is the option to download Yosemite Server Backup Basic backup and recovery software providing a backup application to protect a single server. If data is critical to your business, protect it with an HP LTO Ultrium tape drive.

HP StoreEver LTO Ultrium Full-Height Tape Drives

HP StoreEver LTO-6 Ultrium 6650 Tape Drive

HP LTO-6 Ultrium 6650 Tape Drive sets new standards for capacity, performance, usability and manageability. The Ultrium 6650 tape drive represents HP's sixth-generation of LTO tape drive technology capable of storing up to 6.25TB (compressed 2.5:1) per cartridge while providing enterprise tape drive monitoring and management capabilities with HP TapeAssure, ease of use with support for LTFS and AES 256-bit hardware data encryption, easy-to-enable security to protect the most sensitive data and prevent unauthorized access of tape cartridges. Capable of data transfer rates up to 400MB/sec (compressed 2.5:1), HP's exclusive Data Rate Matching feature further optimizes performance by matching speed of host to keep drives streaming and increase the reliability of the drive and media. The Ultrium 6650 provides investment protection with full read and write backward support with LTO-5 media, and the ability to read LTO-4 cartridges. By more than doubling the compressed capacity of previous generation Ultrium drives, HP customers now require fewer data cartridges to meet their storage needs, significantly reducing their IT costs and increasing their ROI.

HP StoreEver LTO-6 Ultrium 6650 External Tape Drive

HP StoreEver LTO-6 Ultrium 6650 Internal Tape Drive

Overview

HP StoreEver LTO Ultrium Full-Height Tape Drives

HP StoreEver LTO-5 Ultrium 3280 Tape Drive

The Ultrium 3280 represents HP's fifth-generation of LTO tape drive technology capable of storing up to 3TB per cartridge while providing enterprise tape drive monitoring and management capabilities with HP TapeAssure, ease of use with support for LTFS and AES 256-bit hardware data encryption, easy-to-enable security to protect the most sensitive data and prevent unauthorized access of tape cartridges. Capable of data transfer rates up to 280MB/sec, HP's exclusive Data Rate Matching feature further optimizes performance by matching speed of host to keep drives streaming and increase the reliability of the drive and media. The Ultrium 3280 provides investment protection with full read and write backward support with LTO-4 media, and the ability to read LTO-3 cartridge. By nearly doubling the capacity of previous generation Ultrium drives, HP customers now require fewer data cartridges to meet their storage needs, significantly reducing their IT costs and increasing their ROI.

Ultrium 3280 External Tape Drive

Ultrium 3280 Internal Tape Drive

Models

HP StoreEver LTO-6 Ultrium 6250 Tape Drive

The HP LTO-6 Ultrium 6250 tape drive represents HP's sixth-generation of LTO tape drive technology capable of storing up to 6.25TB (compressed 2.5:1) per cartridge while providing enterprise tape drive monitoring and management capabilities with HP TapeAssure, ease of use with support for LTFS and AES 256-bit hardware data encryption easy-to-enable security to protect the most sensitive data and prevent unauthorized access of tape cartridges. Capable of data transfer rates up to 1.44TB/Hour (compressed 2.5:1), HP's exclusive Data Rate Matching feature further optimizes performance by matching speed of host to keep drives streaming and increase the reliability of the drive and media. HP LTO Ultrium half-height drives are designed for server customers in direct attached storage (DAS) environments where hard disk and system bottlenecks can impede data transfer rates. The Ultrium 6250 tape drives provides investment protection with full read and write backward support with LTO-5 media, and the ability to read LTO-4 cartridges. By more than doubling the compressed capacity of previous generation Ultrium drives, HP customers now require fewer data cartridges to meet their storage needs, significantly reducing their IT costs and increasing their ROI.

HP StoreEver LTO-6 Ultrium 6250 External Tape Drive

HP StoreEver LTO-6 Ultrium 6250 Internal Tape Drive

HP StoreEver LTO-5 Ultrium 3000 Tape Drive

The HP LTO-5 Ultrium 3000 represents HP's fifth-generation of LTO tape drive technology capable of storing up to 3TB per cartridge while providing enterprise tape drive monitoring and management capabilities with HP TapeAssure and AES 256-bit hardware data encryption easy-to-enable security to protect the most sensitive data and prevent unauthorized access of tape cartridges. Capable of data transfer rates up to 1TB/Hour HP's exclusive Data Rate Matching feature further optimizes performance by matching speed of host to keep drives streaming and increase the reliability of the drive and media. HP LTO Ultrium half-height drives are designed for server customers in direct attached storage (DAS) environments where hard disk and system bottlenecks can impede data transfer rates. The Ultrium 3000 provides investment protection with full read and write backward support with LTO-4 media, and the ability to read LTO-3 cartridge. By nearly doubling the capacity of previous generation Ultrium drives, HP customers now require fewer data cartridges to meet their storage needs, significantly reducing their IT costs and increasing their ROI.

LTO-5 Ultrium 3000 External Tape Drive

LTO-5 Ultrium 3000 Internal Tape Drive

Models

HP StoreEver LTO-4 Ultrium 1760 Tape Drive

The HP LTO-4 Ultrium 1760 Tape Drive is HP's fourth-generation of half-height LTO tape drive technology capable of storing up to 1.6 TB per cartridge in under 3 hours. Available in both SCSI and SAS models, HP Ultrium half-height drives are designed for server customers in direct attached storage (DAS) environments where hard disk and system bottlenecks can impede data transfer rates. To further protect the most sensitive data, AES 256-bit hardware data encryption provides easy-to-enable security to prevent unauthorized access of tape cartridges. By using LTO-4 hardware data encryption, not only is data fully capable of being compressed therefore maximizing capacity, encrypted backups are completed without a loss in performance. Capable of data transfer rates up to 160 MB/sec, HP's exclusive Data Rate Matching feature further optimizes performance by matching speed of host to keep drives streaming and enabling the fastest performance of any tape drive in the industry. The Ultrium 1760 provides investment protection with full read and write support with LTO-4 and LTO-3 media, and the ability to read LTO-2 cartridge. By doubling the capacity of previous generation Ultrium drives, HP customers now require fewer data cartridges to meet their storage needs, significantly reducing their IT costs and increasing their ROI.

LTO-4 Ultrium 1760 External Tape Drive

LTO-4 Ultrium 1760 Internal Tape Drive

HP StoreEver LTO-3 Ultrium 920 Tape Drive

The HP LTO-3 Ultrium 920 tape drive is HP's third generation of half-height LTO tape drive technology. The Ultrium 920 delivers a compressed storage capacity of 800 GB per data cartridge and a compressed data transfer rate of 432 GB per hour, two and a half times faster than the previous generation Ultrium 448 tape drive. Available in both SCSI and SAS models, the Ultrium 920 is ideal for midrange and departmental servers. The Ultrium 920 Tape Drive is fully read and write compatible with all second-generation Ultrium drives and media and offers further investment protection through its backward-read compatibility with first-generation Ultrium media. For IT organizations with stringent, long-term data retention requirements, the Ultrium 920's WORM (Write-Once, Read-Many) data protection feature offers a simple and secure method for archiving records as part of a compliance solution to meet the toughest of industry regulations.

Models

LTO-3 Ultrium 920 External Tape Drive

LTO-3 Ultrium 920 Internal Tape Drive

Features

Key Features

- **High-Capacity:** Large-capacity drive capable of storing up to 6.25TB (with LTO-6) of compressed storage on a single cartridge, requiring fewer data cartridges to meet storage needs, significantly reducing IT and archiving costs
- **Ease of use with LTFS and HP StoreOpen** - providing a self-describing file system with HP LTO-5 and LTO-6 cartridges, which enables the combined archiving benefits of application independence, transportability and protection from obsolescence.
- **Secure:** AES 256 bit data encryption and support for WORM media provide a secure method for long-term retention of critical data records
- **Fast:** Fast data transfer rate up to 400MB/sec (LTO-6 compressed) to meet demands of even the tightest backup window
- **Manageable:** HP Library and Tape Tools (LTT) provides HP TapeAssure health monitoring and operational information on performance and utilization for peace of mind and to allow you to optimize your configuration to get the most out of your drives and media as well as help with installation and troubleshooting Affordable: high capacity combined with low media cost delivers an exceptionally low cost of ownership and ensures a faster return on investment
- **Reliable:** HP's exclusive data rate matching feature automatically adjusts the drive's read and write speed based on the server and network environment, which increases performance, reduces mechanical wear on the drive, and extends tape life. Soft-load feature automatically takes the data cartridge and moves it into the load position. Advanced tape leader capture design ensures fail-safe cartridge loading. Active head cleaning provides automated cleaning that increases head life and reduces the need for using the cleaning cartridge. Lower power consumption for maximum reliability with minimum environmental costs
- **Compatible:** qualified/tested on all industry-leading operating systems, backup software and servers. Fully read-and-write compatible with LTO Ultrium drives and media from other manufacturers
- **Agile:** choice of models including internal, external, array module, and rack-mount to meet your backup configuration needs inside and outside of the server
- **Value:** Includes the option to download Yosemite Server Backup Basic backup and recovery software, see: www.barracudaware.com/ysbbasic
- **Investment Protection:** delivers a compelling technology roadmap that offers higher capacity and performance tape solutions with backward read and write compatibility for previous drive generations
- **Open:** based on the LTO technology open standard, delivering customers a greater choice of vendors and solutions without compromising compatibility across Ultrium products

Product Highlights

LTO Ultrium Technology

Linear Tape-Open technology was developed by three leaders in the storage industry - HP, IBM, and Quantum - who brought together their combined expertise in tape technology to develop an entirely new format based on the best of existing technologies. Because LTO Ultrium technology was a new format, it required no cumbersome support of legacy formats, so it could be designed without compromising on reliability or performance. The LTO Program, a consortium of the three technology provider companies, has developed a well-defined six-generation roadmap.

Ultrium LTO-2 tape drive technologies from HP use a linear format of 384 tracks and 512 tracks (respectively), writing eight tracks simultaneously. Ultrium LTO-3, LTO-4, LTO-5 and the new LTO-6 tape drive features a breakthrough in recording technology by writing sixteen tracks simultaneously on a linear format of 704 tracks, 896 tracks 1280 tracks and 2176 tracks (respectively). The data is written in a serpentine pattern; the tape reverses direction after each set of tracks is written. This provides higher density recording, enabling customers to lower costs and increase efficiency by storing more data on a single tape in an industry standard format.

The LTO standard for backward compatibility is to write back one generation and read back two generations; therefore:

- First-generation LTO Ultrium drives (HP Ultrium 230, HP Ultrium 232) read and write LTO 1 media
- Second-generation LTO Ultrium drives (HP Ultrium 460, HP Ultrium 448) read and write LTO 1 and LTO 2 media.
- Third-generation LTO Ultrium drives (HP Ultrium 920, Ultrium 960) read and write LTO 2 and LTO 3 media and also read LTO 1 media.
- Fourth-generation LTO Ultrium drives (Ultrium 1840, Ultrium 1760) read and write LTO 3 and LTO 4 media and also read LTO 2 media.
- Fifth-generation LTO Ultrium drives (Ultrium 3280, Ultrium 3000) read and write LTO 4 and LTO 5 media and also read LTO 3 media.
- Sixth-generation LTO Ultrium drives (Ultrium 6650, Ultrium 6250) read and write LTO 5 and LTO 6 media and also read LTO 4 media.

As part of the LTO open standard, all HP tape drives and media offer the same standards of compatibility with tape drives and media manufactured by other LTO vendors.

LTO data compression (LTO-DC) is an enhanced version of Advanced Lossless Data Compression (ALDC) hardware compression. Compression is automatically turned off if the compressed data would cause an overall expansion in data size, hence optimizing the available capacity on the media. Data compression is also turned off if data is found to be uncompressible; thus, allowing for better data scans. The system is used in all LTO Ultrium tape drives.

The decision about which tape technology you should buy next should be based on your future, not your past, investment. Choose the LTO Ultrium format when you need the following advantages:

- Maximum reliability, capacity and performance
- Compatibility with a broad range of operating systems and servers (e.g., a mixed system environment)
- A legacy-free technology that uses the best attributes from a wide range of tape technologies without any compromises for backward compatibility requirements
- A solid roadmap for future generations of the technology
- An open format available from multiple vendors
- Lowest media cost of any 'superdrive' tape technology

Product Highlights

Hardware Based Encryption

HP LTO-4, 5 and 6 LTO Ultrium tape drives support hardware-based encryption to enable greater levels of security:

- AES 256-bit Encryption
 - Easy-to-enable encryption for a secure backup
 - Helps prevent unauthorized accessed of tape media if cartridges are lost or stolen
 - Eliminates the need to purchase and manage additional h/w
- No loss in performance of backup
- The Yosemite Server Backup Basic backup and recovery software supports LTO-4, LTO-5 and LTO-6 encryption and makes writing encrypted backups simple. A passphrase is entered and Yosemite Server Backup Basic creates and manages the encryption key. For more information visit: <http://www.hp.com/go/encryption>

TapeAssure

HP TapeAssure makes managing, optimizing and archiving on the HP LTO Ultrium tape drives easier. This tool provides additional management and monitoring capabilities including:

- Life and health information for media and drives
- Information on media and drive utilization and operational performance
- Notifications of drive and media characteristics that fall below HP recommended standards

TapeAssure health reports and alerts give you peace of mind knowing the condition of the drives, the tapes and the data on each tape. TapeAssure monitors every backup to ensure the highest standards of reliability, sends alerts when these standards are not met, and ensures that you can maintain the drives and tapes used in an archive environment to have the highest integrity.

HP TapeAssure is included as part of HP Library and TapeTools for Windows users from LTT 5.0 onwards. Instructions and downloads of HP Library and Tape Tools are available at: <http://www.hp.com/support/tapetools>

Linear Tape File System (LTFS)

LTFS makes tape self-describing, file-based, and easy-to-use, it also provides users with the ability to use standard file operations on tape media for accessing, managing and sharing files with an interface that behaves just like a hard disk. In addition, LTFS provides the ability to share data across platforms, as you would with a USB drive or memory stick. Simply load a tape into the drive, mount it into the file system, and it becomes visible as a disk.

For more information, including user guide, downloads and compatibility, visit: www.hp.com/go/lfts

HP StoreOpen Standalone

HP StoreOpen Standalone is a free software application that helps LTFS users to use and manage single tape drives.

Available for Windows and Mac environments, it provides a native GUI with a familiar look and feel. It is installed automatically as part of the LTFS package and it completely removes the need for low-level terminal commands by guiding users through the full process of select, prepare and mount an LTFS cartridge.

For more information, including user guide, downloads and compatibility, visit: <http://www.hp.com/go/HPStoreOpen>

Product Highlights

Data Rate Matching

Data Rate Matching combines sophisticated buffer management with HP's exclusive Variable Adaptive Tape Speed technology to allow the tape drive to match its transfer rate to the host speed dynamically and continuously across the wide range of transfer rates. This feature ensures that the tape drive continues to stream data regardless of the environment, and brings two big advantages:

- It optimizes backup performance, regardless of the speed of the host or the network
 - It minimizes rewinding and repositioning of the tape, reducing wear and increasing reliability
-

WORM (Write-Once, Read-Many) Drive and Media Support

Critical to the success of data retention policies in highly regulated environments is the ability to store and manage data in an unalterable state. Following stringent guidelines set forth by regulatory agencies such as the SEC and HIPPA, IT organizations must now integrate new solutions and policies that can verify the integrity of stored data for periods that can extend well beyond seven years.

LTO-3, 4, 5 and 6 tape drives feature the ability to archive and store data in a non-rewriteable format that meets the most stringent regulatory guidelines. Using a combination of integrated fail-safe features in the drive firmware, cartridge memory, and tape formatting, LTO Ultrium drives can archive large amounts of data for periods of up to 30 years in a secure, untampered state. Since all LTO-3, 4, 5 and 6 tape drives include support for both rewritable and WORM media, IT organizations can now easily integrate a secure, long-term archiving solution into their current data protection strategy. As compared to other technologies that feature support for WORM storage, LTO-3, 4, 5 and 6 offers the advantages of:

- A single drive to support all backup and archiving needs
- Two distinctive tape cartridges to easily distinguish and manage both rewriteable and WORM data cartridges
- A specially designed WORM data cartridge with multiple integrated fail-safe features to prevent accidental or intentional overwriting of data
- High-capacity, low-cost HP WORM media that can store 800GB (LTO-3), 1.6TB (LTO-4), 3TB (LTO-5) or 6.25TB (LTO-6) of data on a single data cartridge
- Support from many backup and archiving software vendors, providing the most comprehensive and mainstream support in the industry
- The LTO open standard that offers greater choice and compatibility across all third-generation Ultrium products

NOTE: While all HP LTO-3, 4, 5 and 6 tape drives support LTO Ultrium WORM media, some third-generation LTO Ultrium tape drives from other manufacturers may not include read and write support for LTO Ultrium WORM media. For non-HP LTO-3 and LTO-4 tape drives, please check the manufacturers' specifications to ensure this support is provided if you are using your WORM media. If WORM support is not provided, the drive will eject the WORM tape cartridge immediately upon insertion into the tape drive.

Product Highlights

HP OBDR (One-Button Disaster Recovery) One-Button Disaster Recovery is an HP exclusive feature that provides fast and simple disaster recovery through the use of an HP tape drive. OBDR is a firmware-driven utility that can restore a server's operating system, software applications, and data using a single tape cartridge. Depending on the size of the data set, OBDR can provide system recovery in less than one hour, reducing the recovery window by more than 50 percent and minimizing the risks and costs associated with downtime. There's no longer a need to search for software disks and manuals or make a new set of disaster recovery disks each time the network configuration is altered or a peripheral is added. The sheer simplicity of OBDR means less human error. Backup and disaster recovery preparation, previously two separate tasks, now become one process. For more information about OBDR, visit the HP website at: <http://www.hp.com/go/obdr>.

For a current list of servers, workstations, and software that support OBDR, check the tape backup compatibility pages on the HP website at: <http://www.hp.com/storage/SPOCK>.

Included Software

The HP Ultrium tape drives provide the option to download Yosemite Server Backup Basic backup and recovery software. It is an easy-to-use backup and recovery application that is installed in minutes and includes all the features needed to protect a single machine by backup to a HP tape drive. Yosemite Server Backup Basic includes pre-defined and customizable media rotation schemes so you can define when you backup and how long your backups are retained, while easily managing your LTO data cartridges. Up to 4 parallel data streams keep the high-speed Ultrium tape drives streaming. Yosemite Server Backup Basic supports all the features of the Ultrium tape drives. LTO-4, LTO-5 and LTO-6 data encryption can be specified for any backup job and is configured using the easy-to-manage interface. The Yosemite Server Backup Basic Bare Metal Disaster Recovery (BMDR) feature supports the One Button Disaster Recovery capability of the Ultrium tape drives for fast and automated recovery of a ProLiant server after a major disaster. Backup to LTO WORM media is supported. Backup data compression can be turned on or off as part of the backup job specifications.

For more information please visit:

www.barracudaware.com/ysbbasic

NOTE: Yosemite Server Backup Basic comes with 30 days of free Maintenance and Support. After that time, customers have the option to upgrade to a retail version with Maintenance and Support.

NOTE: Yosemite Server Backup Basic replaces Data Protector Express Basic as the Backup & Recovery software option with HP LTO Ultrium tape drives.

If the HP Ultrium tape drive is for a large environment that requires UNIX support and/or enterprise class application and feature support then HP Data Protector is the recommended backup and recovery software. There is no upgrade path from Yosemite Server Backup Basic or Data Protector Express Basic or Data Protector Express to Data Protector. If current or future requirements will require Data Protector, this software should be installed from day 1. For more information and evaluation software please visit: <http://www.hp.com/go/dataprotector>.

Product Highlights

HP Ultrium Storage Media

HP recommends that you use HP-branded cartridges in your HP Ultrium tape drive to assure the highest level of protection for your valuable data. Our test program for HP Ultrium media is the most thorough and comprehensive in the industry.

All HP cartridges must satisfy an exhaustive battery of additional tests that relate directly to real life situations, where real data and real businesses are at stake. The benefit of the HP brand specification for media is consistent quality. Through the testing of thousands of HP drives and HP cartridges, the ideal formulation for backup performance is defined and then continuously monitored. This hugely resource-intensive process is unique to HP and affords deep insight into the HP+HP backup solution for a wide range of environments and duty cycles. Your best choice for ease of support and maximum dependability is to use HP-branded Ultrium cartridges at all times.

Diagnostics

HP LTO Ultrium tape drives and automation are supported by HP Library and Tape Tools (LTT). This tool is intended to help in the installation and maintenance of HP tape drives and devices, including:

- Verifies installation of the drive
- Test/verify the health of the drive and media
- Provides HP support with detailed device information
- Multiple options for finding and upgrading new firmware
- Performance optimization and recommendations
- Included with each Ultrium tape drive and available via free download supporting all HP tape products

Instructions and downloads of HP Library and Tape Tools are available at:

<http://www.hp.com/support/tapetools>

HP Library and TapeTools includes HP TapeAssure monitoring for Windows users from LTT 5.0 onwards.

Compatibility

HP's extensive compatibility testing program assures that your HP Ultrium tape drive works with leading servers, operating systems, and backup applications - and not just those sold by HP. HP Ultrium tape drives work seamlessly on many platforms, making them especially suitable if you have a mixed system environment. For the latest list of servers, workstations, operating systems, and backup software that support HP Ultrium tape drives, check the tape backup compatibility pages on our Web site at: <http://www.hp.com/storage/SPOCK>

Server Compatibility HP Ultrium tape drives are supported on the following classes of HP systems:

- HP ProLiant DL servers
- HP ProLiant ML servers
- HP Integrity servers
- HP 9000 servers
- HP AlphaServers
- HP workstations

HP Ultrium tape drives are also supported on server platforms from third-party manufacturers including:

- Dell
- IBM
- Sun

For details of which tape drive models work with which systems, including third-party systems, visit: <http://www.hp.com/storage/SPOCK> for the latest hardware compatibility information.

OS Support

Microsoft® Windows, HP-UX, Tru64, Red Hat Linux, SUSE Linux, IBM-AIX, Sun Solaris and other operating systems.

NOTE: Please visit: <http://www.hp.com/storage/SPOCK> for the latest compatibility information.

Backup Software Support

Supported with HP Data Protector, Yosemite Server Backup Basic, HP Data Protector Express Basic, HP Data Protector Express, CA ARCserve Backup, EMC NetWorker, EMC Retrospect, IBM Tivoli Storage Manager, Symantec NetBackup, Symantec Backup Exec, BakBone NetVault, Commvault Galaxy, Tolis Group BRU and Yosemite Backup

NOTE: Please visit: <http://www.hp.com/storage/SPOCK> for the latest compatibility information.

SAS Installation

HP SAS tape drives are available as internal and external models. Both models are supplied with SAS cables that allows you to connect to an internal port (if available) on the embedded SAS controller inside the server.

Some server models will allow direct connect to a spare SAS connector on the native SAS controller. Other servers which do not have a spare connector might require you to reconfigure hard disk drive bays and in a few instances, you may also lose the use of one of the hard disk drive bays and will need to rebuild your RAID configuration. In these configurations the simple, recommended solution is connecting to an option SAS host bus adapter and optional SAS cable.

For the most up-to-date information about recommended SAS HBAs and supported cabling configurations with your make and model of server, always refer to: <http://www.hp.com/storage/SPOCK>

Compatibility

Cables and Termination

All cables required for a typical internal and external connection to HP servers are provided with your tape drive. For non-HP servers, please consult your manufacturers' server specifications to determine if the cable provided with your LTO Ultrium tape drive is appropriate for use with that server.

No terminator is required for SCSI internal models (assumes use of terminated cable). The SCSI external model features "auto-termination" - no terminator is required.

SAS-based Ultrium models ship with SAS cable which allows direct attach from embedded SAS controller.

NOTE: Visit: <http://www.hp.com/storage/SPOCK> for the latest compatibility information.

Performance Tuning

Use HP Library and Tape tools to assist in this area at: <http://www.hp.com/support/tapetools>

Device performance test - will run data to an LTO drive direct from memory to prove the drive is capable of high performance if the data supply rate is fast enough.

System performance test for backup will read data from your primary storage device e.g. EVA disk array, and tell you how fast the array can supply multiple streams of data

System performance test for restore, this tool generates data of a known size and compressibility for benchmarking purposes.

Service and Support, HP Care Pack, and Warranty Information

Warranty and Services Included with the Product Hewlett-Packard provides a 3-year, next-day, product exchange, limited warranty for all the Ultrium Tape Drives, plus 9x5 phone support for the duration of the warranty.

For more information about HP's Global Limited Warranty and Technical Support, visit:
ftp://ftp.compaq.com/pub/products/storageworks/warranty/EN_321708-008.pdf

HP Care Pack Services: Packaged server and storage services for increased uptime, productivity and ROI. When you buy HP server and storage products and solutions, it's also a good time to think about what levels of support you may need. Our portfolio of service options reduce deployment and management worries while helping you get the most out of your server and storage investments. We take a holistic approach to your environment, bridging servers, blades, storage, software and network infrastructures with our packaged HP Care Pack Services for servers and storage.

Protect your business beyond warranty
When it comes to robustness and reliability, standard computing equipment warranties have matured along with technology. Good news that can also create problems stemming from depending on standard warranties designed to only protect against product defects and some downtime causes. Using a standard approach to warranty uplifts, such as HP Care Pack Services, helps reduce downtime risks and provides operational consistency for mission-critical and standard business computing.

HP Care Pack Services: Upgrading or extending standard server and storage warranties cost effectively. HP Care Pack Services offer a standard reactive hardware and software support services suite sold separately, or combined with our Support Plus and Support Plus 24 services. The portfolio also provides a combination of integrated proactive and reactive services, such as Proactive 24 Service and Critical Service. In addition with HP Proactive Select, you can acquire the specific proactive constancy and technical services. HP Proactive Select menu offers a broad set of service options that you can mix and match depending on your specific requirements. Proactive service options include offers for server, storage, network, SAN device, software, environment and education services.

HP server and storage lifecycle support services offers a full spectrum of customer care—from technology support to complex migrations to complete managed services. HP Factory Express provides customization, integration and deployment services for turnkey solutions. HP Education Services offer flexible, comprehensive training on to help your IT staff get the most out of your server and storage investments. HP Financial solutions extend innovative financing and cost-effective asset management programs—from purchase to equipment retirement.

Learn more: www.hp.com/services/servers and www.hp.com/services/storage

NOTE: Care Pack Services availability may vary by product and country.

HP Care Pack Services are sold by HP and HP Authorized Service Partners:

- Services for customers purchasing from HP or an enterprise reseller are quoted using HP order configuration tools.
- Customers purchasing from a commercial reseller can find HP Care Pack Services at <http://www.hp.com/go/lookuptool>

Service and Support, HP Care Pack, and Warranty Information

Recommended HP Care Pack Services for optimal satisfaction with your HP product.

Recommended Support

HP Foundation Care 24x7 connects you to HP 24 hours a day, seven days a week for assistance on resolving issues - hardware onsite response within four hours and software call back within two hours after opening your case. Three years' coverage recommended with HP Care Pack Service.

HP Foundation Care 24x7 connects you to HP 24 hours a day, seven days a week for assistance on resolving issues - hardware onsite response within four hours and software call back within two hours after opening your case. Three years' coverage recommended with HP Care Pack Service.

Important Notice for Tape Drives Installed in a 1U or 3U Rack Mount Kit

NOTE: These Care Packs do not apply to Tape Drives mounted in a 1U or 3U Rack Mount Kit. The HP Rack Mount Kit Care Pack covers the all possible configurations of Tape Drives. Hence the Care Packs for 1U & 3U Rack Mount Kit covers all encumberant drives.

Please follow the following url for the correct Care Pack Services and descriptions:

http://h18000.www1.hp.com/products/quickspecs/10854_div/10854_div.pdf

Important Notice for Internal Tape Drives Installed in an HP Server

NOTE: These Care Packs do not apply to Internal Tape Drives because they do not have Care Packs associated with them if they are mounted in an HP Server. Hence the Care Packs for the HP Server covers all encumberant drives.

Please follow the following url for the correct Care Pack Services and descriptions:

For ProLiant use:

<http://h18000.www1.hp.com/products/quickspecs/ProductBulletin.html>

For BCS use:

<http://h18000.www1.hp.com/products/quickspecs/ProductBulletin.html>

Important Notice for Tape Drive Modules Installed in an HP Tape Array

NOTE: These Care Packs do not apply to Tape Drives mounted in an HP Tape Array because they do not have Care Packs associated with them. Hence the Care Packs for the HP Tape Array covers all encumberant drives.

Please follow the following url for the correct Care Pack Services and descriptions:

HP Installation Service

For smooth startup and better business outcomes, HP Hardware Installation - this service provides initial hardware installation of your product into your technology environment (system configuration is not included). In today's new era of business technology- customers can trust the services professionals at HP to work collaboratively with them, putting our strategic and technical know-how to work across their entire infrastructure.

- Allows your IT resources to stay focused on their core tasks and priorities
- Reduces implementation time, impact and risk to your storage environment

Service and Support, HP Care Pack, and Warranty Information

eSupport

HP eSupport is a portfolio of technology-based services that assist you with managing your business environment - from the desktop to the data center.

Support Portal

The HP support portal provides one-stop access to the information, tools and services you need to manage the daily operations of your IT environment.

Features include:

- Access to self-solve tools (including search technical knowledge base)
- Efficient logging and tracking of support cases
- Collaboration with other business and IT professionals
- Download of patches and drivers
- Access to diagnostic tools
- Proactive notification of relevant information

Access to certain features of the support portal requires an HP service agreement. To access the support portal, visit: <http://www.hp.com/support>

Customer Technical Training

HP Education Services

In today's cost-conscious business environment, IT professionals, developers, consultants and users face an interesting challenge: how to keep up with the latest technologies and expand important skills while delivering profitable results on current projects. To help address this challenge, HP offers innovative training solutions that help keep you up-to-date on virtualization, server, storage, Insight Control, Citrix, Microsoft® and open source/Linux-related topics-while spending less time away from business-critical activities.

HP Services Awards

HP Technology Services continues to be recognized for service and support excellence by customers, partners, industry organizations and publications around the world. Recent honors and award reflect our services team's dedications, technical expertise, professionalism and uncompromising commitment to customer satisfaction.

Additional Services Information

To learn more on HP ProLiant servers, HP BladeSystem servers and HP storage products, please contact your HP sales representative or HP Authorized Channel Partner. Or visit: www.hp.com/services/proliant or www.hp.com/services/bladesystem or <http://www.hp.com/services/storage>

Rack-mount Options

HP StoreEver 1U SCSI Rack-mount Kit	A7445C
NOTE: For racked ProLiant servers. No drives included. Accommodates up to two internal half-height drives (such as LTO-3 Ultrium 920 and LTO-4 Ultrium 1760).	
NOTE: Please refer to web page for further information: http://h18006.www1.hp.com/products/storageworks/1urackmount/index.html	
HP StoreEver 1U SAS Rack-mount Kit	AE459B
NOTE: For racked ProLiant servers. No drives included. Accommodates up to two internal SAS half-height drives (such as LTO-3Ultrium 920, LTO-4 Ultrium 1760, LTO-5 Ultrium 3000 and LTO-6 Ultrium 6250).	
NOTE: Please refer to web page for further information: http://h18006.www1.hp.com/products/storageworks/1urackmount/index.html	
HP StoreEver 3U SAS Rack-mount Kit	AG576B
NOTE: For racked SAS-based ProLiant servers. No drives included. Accommodates up to four internal half-height drives (such as LTO-3Ultrium 920 SAS, LTO-4 Ultrium 1760, LTO-5 Ultrium 3000 and LTO-6 Ultrium 6250) or two full-height drives (such as the LTO-4 Ultrium 1840 SAS, LTO-5 Ultrium 3280 or LTO-6 Ultrium 6650).	
NOTE: Please refer to web page for further information: http://h18006.www1.hp.com/products/storageworks/3urackmount/index.html	
NOTE: #0D1 will appear after this part number on your sales order if factory integration into a rack is indicated.	

Cables and Adapters

VHDCI/Wide 12 Ft. Cable	341177-B21
NOTE: for external drives	
5m Wide Differential SCSI Cable 68 pin	328215-001
NOTE: for external drives	
10m Wide Differential SCSI Cable 68 pin	328215-002
NOTE: for external drives	
HP Ultra 320 SCSI Cable Kit	DW063B
Note: for installing Ultra320 SCSI tape drives in the 3U and 5U Rack-Mount Kits)	
SAS cable, Int. Drive SFF8482, split to 2 x Internal SFF8484, 1m	AE490A
NOTE: Use this cable to connect HP Ultrium 448, 920, 960, 1760, and 1840 SAS internal tape drives to SAS 4i (SFF8484) connectors.	
HP 1m with Power SAS Cable	AE491A
NOTE: Use this cable to connect HP Ultrium 3280 and 3000 SAS internal tape drives to SAS 4i (SFF8484) connectors.	
HP Mini-SAS Cable for LTO Internal Tape Drive	AP746A
NOTE: Use this cable to connect HP LTO Ultrium internal tape drives to Mini-SAS (SFF8087) ports.	

Options

HP SAS External-Min 1x-2M Cable Assembly Kit NOTE: Use this cable to connect HP SAS external tape devices to HP SAS controllers with Infiniband (SFF8470) connectors.	AE466A
HP 1U SAS Ext-Min 1x-4M Cable Assembly Kit NOTE: Use this cable to connect HP SAS external tape devices to HP SAS controllers with Infiniband (SFF8470) connectors.	AE468A
HP SAS Min-Min 1x-2M Cable Assembly Kit NOTE: Use this cable to connect HP SAS external tape devices to HP SAS controllers with external Mini-SAS (SFF8088) connectors.	AE470A
HP SAS MIN-MIN 1X-4M Cable Assembly Kit NOTE: Use this cable to connect HP SAS external tape devices to HP SAS controllers with external Mini-SAS (SFF8088) connectors.	AE465A
HP 1U SAS TP I-E 3HDDs X 1Tape Drive X4M Server Cable Assembly Kit NOTE: This split cable connects internally to SAS Hard Drive Cage (3x) and externally to the tape device (1x) with other connector attaching to HP SAS controllers with SAS 4i (SFF8484) connectors. The 1x cable occupies additional PCI slot on the server.	AE464A
HP SAS MIN-MIN 3X1X-5M Cable Assembly Kit NOTE: This split cable connects internally to SAS Hard Drive Cage (3x) and externally to the tape device (1x) with other connector attaching to the Smart Array P400i controller inside a DL360 G5 or DL365 G5 server. The 1x cable occupies additional PCI slot on the server.	AG452A

Technical Specifications

		400 GB	800 GB	1.5 TB	2.5TB	
Capacity	Native	400 GB	800 GB	1.5 TB	2.5TB	
	Compressed (assumes 2:1 data compression for LTO-4 and 5; 2.5:1 compression for LTO-6))	800 GB	1.6 TB	3 TB	6.25TB	
Performance	Buffer Size	64 MB	128 MB	256 MB	512MB	
	Sustained transfer rate, native	60 MB/s	80 MB/s	140 MB/s	160MB/s	
	Sustained transfer rate, compressed (assumes 2:1 data compression for LTO-4 and 5; 2.5:1 compression for LTO-6)	120 MB/s	160 MB/s	280 MB/s	400MB/s	
	Burst transfer rate	320 MB/s (with Ultra320 SCSI); 300 MB/s (with 3Gb/sec SAS)	300 MB/s (with 3Gb/sec SAS)	600 MB/s (with 6Gb/s SAS)	600 MB/s with 6Gb/s SAS	
	Data rate matching range	20-60 MB/s (native)	33-80 MB/s (native)	47-140 MB/s (native)	54-160 MB/s (native)	
	Data access time (from BOT)	64 s typical for a 200 GB tape (native)	64 s typical for a 800 GB tape (native)	52 s typical for a 1.5 TB tape (native)	50 seconds typical for LTO 6 media	
	Average load time	>19 s	>19 s	>19 s	24s	
Reliability	Average unload time	19 s	19 s	19 s	19s	
	Rewind time from EOT	121 s (400 GB tape)	124 s (800 GB tape)	96 s (1.5 TB tape)	98s (2.5TB tape)	
	Rewind tape speed	5.0 m/s	7.0 m/s	9.0 m/s	9.0 m/s	
	MTBF	250,000 hours at 100% duty cycle	250,000 hours at 100% duty cycle	250,000 hours at 100% duty cycle	250,000 hours at 100% duty cycle	
	Uncorrected Error Rate	1 in 1x10 ¹⁷ bits	1 in 1x10 ¹⁷ bits	1 in 1x10 ¹⁷ bits	1 in 1x10 ¹⁷ bits	
	Media Compatibility		LTO Ultrium 1 (Read only);	LTO Ultrium 2 (Read only);	LTO Ultrium 3 (Read only);	LTO Ultrium 4 (Read only);
			LTO Ultrium 2 (Read and Write);	LTO Ultrium 3 (Read and Write);	LTO Ultrium 4 (Read and Write);	LTO Ultrium 5 (Read and Write);
		LTO Ultrium 3 (Read and Write)	LTO Ultrium 4 (Read and Write)	LTO Ultrium 5 (Read and Write)	LTO Ultrium 6 (Read and write)	

Technical Specifications

Tape Format	Recording method	16-channel linear serpentine	16-channel linear serpentine	16-channel linear serpentine	16-channel linear serpentine

Front Panel LED Indicators

HP LTO Ultrium 3 and 4 tape drives have four LED indicators on the front panel:

- Ready
- Drive Error
- Tape Error
- Clean

HP LTO Ultrium 5 and 6 tape drives have five LED indicators on the front panel:

- Ready
- Drive Error
- Tape Error
- Clean
- Encryption

Please consult your HP Ultrium Tape Drive "Getting Started Guide" for more information on how to use these LED indicators for ascertaining drive status and for help in troubleshooting your HP LTO Ultrium tape drive.
